FARAH MOHAMMED BADER

Software Systems Engineer | Full-Stack Developer (Laravel, Vue.js, Next.js)

farahbader104@gmail.com +972 59-713-2739 Gaza https://www.linkedin.com/in/farah-bader

github.com/Farah-bader22

Profile

Strategic Computer Systems Engineer and Technical Team Lead with extensive expertise in Full-Stack Development. Proven track record in architecting scalable backend systems and leading cross-functional teams to deliver high-performance web applications. Highly proficient in Laravel, Vue.js 3, and Next.js, with a deep focus on Database Design, API Integration, and Server-Side Rendering (SSR). Expert in managing complex technical lifecycles using advanced Git Flow and Agile methodologies. Dedicated to engineering clean,
maintainable code and building robust software architectures that drive business growth and technical excellence.

Skills

Frontend Engineering

- **Frameworks:** Vue.js 3 (Composition API), **Next.js**, React.
- **State Management:** Pinia (Centralized State), Redux.
- **Routing & Tooling:** Vue Router (Lazy Loading), Vite, Webpack.
- **Styling: Tailwind CSS**, PrimeVue, CSS3/HTML5.

System Engineering & Analysis

Systems Analysis
Data Modeling
SQL (Schema Design)
Quality Assurance (QA)
UX/UI Fundamentals

Full-Stack Development

Frontend: Vue.js 3 (Composition API), Next.js, React, Pinia, State Management. Backend: Laravel, PHP, MySQL (Database Design & Schema Architecture), RESTful APIs. Web Technologies: HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, PrimeVue.

Leadership & Version Control

Management: Technical Team Leadership, Agile/Scrum Methodology, Task Delegation

Core Development & Version Control

Backend: Laravel, PHP, RESTful APIs.
Database: MySQL (Design & Architecture).
Languages: JavaScript (ES6+), HTML5, CSS3.
Tools: Git Flow, GitHub (Advanced Branching), Axios.

Project Management Principles

Agile/Scrum Methodology, Task Delegation, Deadline Management

Systems Engineering & Architecture

Systems Analysis & Design, Server-Side Rendering (SSR), Data Modeling, Performance Optimization.

Projects

High-End Realty SPA - Project Launch

Lead Frontend Developer

Successfully deployed a high-end Single Page Application (SPA) frontend, built with a robust architecture and ready for production data integration.

High-Performance Technical Knowledge Ecosystem

Full-Stack Engineering Hub (Laravel 11, Vue.js 3 & Inertia.js)

Architected a high-performance SPA using Laravel 11 and Vue.js 3, leveraging Inertia.js for seamless data flow and modern user experience.

Engineered a secure Backend core with PostgreSQL, implementing advanced Middleware and specialized logic for technical resource management.
Mastered complex deployment workflows, resolving critical infrastructure challenges including SSL Encryption, Trusted Proxies, and secure resource delivery.

High-Performance Technical Knowledge Ecosystem

Full-Stack Engineering Hub with Scalable Infrastructure

Built a high-performance SPA using Laravel 11 and Inertia.js to eliminate API overhead.
Engineered a secure backend core with optimized PostgreSQL schema and advanced middleware.
Resolved critical deployment issues, including SSL/Proxy configurations and secure resource delivery.

Vision Board 2026

Full-Stack Engineer & DevOps Specialist (Laravel, Vue.js & Docker)

Full-Stack Architecture: Built a seamless Laravel 11 & Vue.js 3 app optimized for cloud production.
DevOps & Docker: Implemented Containerization for perfect environment parity and automated workflows.
System Automation: Engineered bootstrapping scripts and migrations to eliminate manual infrastructure overhead.
High Performance: Designed a lightweight UI architecture and asset pipeline using Vanilla CSS/JS.

Cloud Deployment: Orchestrated resilient, zero-config scaling and deployment on Render Cloud.

AURA - Digital Sanctuary for Mindfulness

Frontend Engineer & UI/UX Specialist (Vue.js 3, Pinia & Vite)

Developed a seamless, clutter-free SPA using Vue.js 3 and Vite, focusing on high-performance rendering and fluid transitions.
Architected advanced State Management with Pinia, ensuring natural data flow for daily user entries within a personal "Memory Jar" ecosystem.
Engineered a sophisticated UI featuring Glassmorphism aesthetics, blending tranquil tones with responsive design for a premium user experience.
Optimized asset delivery and build processes via Vite, achieving near-instant load times and a lightweight client-side footprint

Courses

Course title: Advanced Vue.js Development (Pinia & Vit Focus)

Front-End Development and Design

UX/UI Fundamentals

Freelancing Principles

Java Programming

Education

B.Sc. in Computer Systems Engineerin

Gaza, Palestine

Al-Azhar University

Academic Focus: Specialized in System Architecture, Advanced Data Structures, and Software Engineering Methodologies.
Key Technical Project: Gamified Programming Education Platform

- **Concept:** Designed and engineered an interactive, gamified platform aimed at simplifying core programming logic for children.
- **Recognition: Achieved a distinguished grade of 99%** for the graduation project, reflecting technical excellence and innovation.
- **Impact:** Developed a scalable learning architecture that bridges the gap between complex logic and user-friendly educational interfaces.

Organisations

Interactive Coding Platform for Children – Community Initiative

Project Lead & Backend Developer (In Progress).

Project Lead & Backend Architect: Led a team of five developers to design and implement the complete Backend Architecture and Database infrastructure for an educational coding platform (Graduation Initiative).

Rantisi Specialized Children's Hospital

Full Stack Developer Trainer (Internship)

Developed a Full-Stack system to manage internal training courses for staff, including user registration, course content scheduling, and tracking trainee progress. Utilized MySQL database and engineered the backend architecture to efficiently support administrative operations and reporting.

Technical Engineering Hub

Technical Team Lead

- Leading and mentoring a cross-functional team of engineers, ensuring the delivery of high-quality software solutions.
- Orchestrating technical workflows and sprint planning to maintain seamless collaboration within a distributed team environment.
- Establishing coding standards and conducting rigorous code reviews to ensure system architecture integrity
